Classic Unified A/C protocol

0/3 T0; 0/3 T1 — Canonical sensitivity reference; model faithfulness not established

MF historical Historical two-version + later audit

Superseded — No external fidelity uplift; incompatible old randomization result superseded

Structured sampling MF surrogate-improvement validation

No qualified candidate — Sampling changes did not clear joint hard gates

HC-G9 HC equal-budget validation

0/3 T0; 0/3 T1 — No joint fidelity/faithfulness/stability/randomization uplift

HC-G25 HC equal-budget validation

0/3 T0; 0/3 T1 — No joint fidelity/faithfulness/stability/randomization uplift
